BluDot and West Elm

## THE STORY

---

### OBJECTIVE

Northville Pickleball Club aimed to create an elevated environment that extended beyond the courts, where members could relax, connect, and unwind. The client envisioned a transitional aesthetic defined by clean lines, layered textures, and a resi-mercial atmosphere that blended comfort with sophistication. Their goal was to deliver a country-club experience that remained approachable, reinforcing their brand as both upscale and community-focused.

### DESIGN SOLUTION

To bring this vision to life, the Rightsize team designed hospitality-inspired lounge environments that encouraged relaxation and conversation. A curated mix of soft-seating solutions, modular pieces, and end tables allowed for easy reconfiguration, supporting both casual hangouts and small social gatherings. The furnishings were selected for comfort, flexibility, and durability, ensuring that members could move seamlessly from play to leisure. Finishes and color palettes were chosen to

maintain a cohesive, elevated aesthetic while offering a warm, welcoming feel throughout the space.

### DESIRED OUTCOME

The completed space embodies a sophisticated yet comfortable social hub, perfectly aligning with the club's identity. Delivered on a fast-track schedule from July to mid-September 2025, the installation was completed in time for the grand-opening celebration. The result is a multi-purpose environment that enhances the member experience, offering a balance of functionality, comfort, and style that encourages people to stay, socialize, and make the most of their time at the club.
