THE STORY

OBJECTIVE

Create a sophisticated workplace that blends mid-century modern character with modern functionality. The client wanted a visually impressive environment that prioritized employee comfort, ergonomic support, and high-performing workspaces while maintaining a polished, professional aesthetic throughout private offices, meeting rooms, and shared spaces.

DESIGN SOLUTION

Rightsize Facility partnered with Huntsman Architectural Group and Golub & Company to deliver a curated workplace featuring premium furnishings, height-adjustable desks, dual monitor arms, desktop power access, and privacy screens that move with the user. Custom veneer applications, stone surfaces, and bold accent colors added sophistication and personality throughout the space.

DESIRED OUTCOME

Deliver a refined, high-end workplace that successfully balances aesthetics, comfort, and performance. The finished space provides employees with ergonomic flexibility, supports productivity and collaboration, and leaves a strong visual impression through timeless design details, premium materials, and vibrant moments of character.
